PROJECTS

Student Record Management System
- MERN stack project: student management system.
- Created robust CRUD app for seamless student record management: insertion, display, search, edit, and deletion.
- Technologies Used:- React.js, Node.js , Express.js, MongoDB

Employee Record Management
- Streamline employee record management by providing flexibility in data structures and key functionalities such as adding, updating, and querying records.
- Technologies Used:- EJS , Node.js, Express.js, MongoDB.

Blood Bank Management System
- Enhance user experience with a user-friendly interface that simplifies the input and retrieval of donor and recipient information, optimizing blood type and donor management.
- Technologies:- HTML, CSS, JavaScript, JSON

Airbnb Clone
- Create a website resembling Airbnb using HTML and CSS. Users can seamlessly browse property listings, access details, and utilize filters. The design mirrors Airbnb's style, ensuring a user-friendly experience.
- Technologies:-HTML, CSS
